

Job Unicorn

Opportunity

- There is no decentralized job marketplace
- Infrastructure needed for crypto currency in freelancing and full time job market
- Need to bring sustainable crypto adoption by inducing employment opportunities

Product

- Blockchain-based jobs marketplace
- Very easy, and decentralised process with a built-in payment system
- A way for employees and hiring managers to find each other

Target Market

- Employers and Job Seekers Worldwide
- People who want access to more affordable talent in countries with low cost of living

How we see us in next 2 years?

- Multichain protocol for carrying out transactions using different currencies
- Browser extension for automated updates on transactions, and job availability
- Implementing rating based filtering using AI
- Easy Integrations with profiles from other platforms
- Improving the experience of both employers and job seekers
